Mirrors

Information and care guide
Please read and retain for future reference

SPECIAL FEATURES

- Take time to understand any special finishes or characteristics that may be a feature of your mirror.
- Be aware that colors and frame finishes on some mirrors may vary.

HEAT

- Avoid exposing your mirror to excessive heat, as this can cause cracking.
- A minimum 12in clearance from heat sources is advised.
- We do not recommend placing/hanging products in excessively high or low temperatures (for example directly above a heat source) or where the environment is often damp.

HANGING

- It is important to use correct sized secure wall fixings. We recommend using a professional service.
- Do not hang your mirror on damp or recently plastered walls.
- Floor-standing mirrors have wall safety chains supplied to prevent the mirror falling forward. These chains must never be used to hang the mirror on a vertical surface.

WARNING INFORMATION

- Do not strike the glass with hard or pointed items.
- Do not use harsh chemicals, detergents or any other substances containing abrasives, as these may scratch the glass.

MAINTENANCE AND CARE INSTRUCTIONS

To help prolong the life of your mirror we advise the following:

Cleaning

- To maintain the appearance of your mirror we recommend regular dusting with a soft cloth.
- Glass or mirrored panels should be cleaned using a water-based glass cleaner and soft cloth, carefully avoiding contact with wooden or painted sections.
- The repeated use of a silicone-containing polish is not recommended as it may lead to a build-up of silicone, forming a layer and altering the appearance of the piece.
- Remove spills immediately using a lightly dampened cloth to avoid damage to glass backing or surface. Water left over a long period of time may cause white spots in the finish.

Care

- Protect delicate flooring from potential marking by feet or legs using felt pads or castor cups.
- Do not drop furniture onto corners or feet or lean backwards on two legs, as this can weaken and damage frames, feet or legs.
- Prevent sharp objects such as toys, buckles and shoe heels from coming into contact with your furniture.
- Avoid contact with any chemicals such as hair and skin products, insect repellents and other cosmetics, or household cleaning materials other than those recommended, as these may affect the finish.
- If your furniture becomes stained, scratched, chipped or suffers other damage, we recommend getting professional advice.
- If you have relevant insurance you may wish to contact your provider for advice.
