Lighting

Information and care guide
Please read and retain for future reference

LIGHTING

OKA lighting is hand-crafted to a high standard with thoughtfully selected materials. With the correct care and maintenance our lighting will provide years of satisfaction. Please familiarize yourself with the following information to ensure your complete satisfaction.

SUNLIGHT AND ENVIRONMENT

- If lamps are exposed to direct sunlight for long periods of time it may cause the color of the ampshade or lamp base to fade.
- At least a 12in clearance from heat sources is advised to prevent color change or permanent marks occurring.
- We do not recommend placing products in excessively high or low temperatures or damp environments as this may cause product issues.

MAINTENANCE AND CARE INSTRUCTIONS

To help prolong the life of your upholstery, we advise the following:

Cleaning

- Water and electricity can be fatal, so be sure to turn off your light at the plug or switch and wait until it has cooled down completely. Then wipe with a soft cloth that has been very lightly dampened with a mild, bleach free detergent solution. Dry with a lint-free cloth or paper towel.
- Following the guidelines above will ensure product performance is maintained. OKA is not responsible for defects caused by the misuse of the product.
