## Pictures & Wall Art

Information and care guide  
Please read and retain for future reference

## HEAT

- Avoid exposing your picture/wall art to excessive heat (for example, by placing it directly above a radiator) as this can cause cracking.
- A minimum 12in clearance from heat sources is advised.
- We do not recommend locating products in excessively high or low temperatures, or where the environment is often damp, as this may cause product issues.

## HANGING

- It is important to use correct-sized secure wall fixings. We recommend using a professional service.
- Do not hang your picture or wall art on damp or recently plastered walls.

## WARNING INFORMATION

- If your wall art or picture is under glass, do not strike the glass with hard or pointed items.
- Do not use detergents or cleansers that contain abrasives, as these may scratch the glass when applied with a cloth.

## MAINTENANCE AND CARE INSTRUCTIONS

To help prolong the life of your upholstery, we advise the following:

### Cleaning

- To maintain the appearance of your picture/wall art, we recommend regular dusting with a soft cloth.
- If your picture/wall art features a glass panel, it should be cleaned using a non-solvent based glass cleaner and soft cloth, carefully avoiding contact with wooden or painted sections.
- The repeated use of a silicone-containing polish is not recommended as it will lead to a build-up of a silicone film which may alter the appearance of the piece.

### Care

- Dropping pictures/wall art can cause damage.
- If the glass panel on your wall art is chipped or broken, immediate repair is recommended to avoid both personal injury and injury to the artwork.
- If your picture/wall art features a glass panel, avoid dragging items across the surface as this may cause fine surface scratches.
- If your picture becomes stained, scratched or chipped, or suffers other damage, we recommend a professional service is sought to restore it.
- If you have relevant insurance you may wish to contact them for advice.
