Pillows & Pads

Information and care guide
Please read and retain for future reference

CARING FOR PILLOWS & PADS

All OKA pillow pads are made with either a fiber, feather or foam core. Our pads are sold separately from our covers, giving you the flexibility to choose your level of comfort. All pads, irrespective of their fillings, require care and attention to ensure long life.

MAINTENANCE AND CARE INSTRUCTIONS

To help prolong the life of your pillows and pads we advise the following:

Care

- Pillows filled with feathers or similar materials should be hand-fluffed and reversed regularly in order to preserve their softness and suppleness. Non-reversible pillows should have their pad turned inside the cover.
- Fiber-filled pads should be regularly plumped to prevent the fibers from binding, which may cause your pillows to flatten or lose their shape.
- Pillow pads with foam cores will have a firmer feel, initially, but will lose some of their original hardness in the first few weeks. This is normal and will not affect the performance of your pillows.
